Care for Common Home Newsletter RNDM

The purpose of this newsletter is to provide news of RNDM involvement in actions and activities related to our ministry of Caring for Our Common Home.

Good news from Bangladesh

Environmental pollution is one of the greatest problems that human society is facing today. City dwellers used to throw household waste into the canals and drains of the city due to lack of garbage, sewerage and drainage systems. Most of the drains in our areas are already damaged due to unplanned construction and throwing the waste to the drains by the city dwellers and Increasing the mosquito population.

After Reporting to the Ward Commissioner of Chittagong City regarding the matter of this environmental pollution, the project has been taken by the City corporation to close the open sewerage and drainage in front of our convent, church and not only in our premises as the project also taken to the surrounding areas wherever the sewerage and drains were open.

A success story because a Sister took the initiative to seek out the authorities and see what could be done. Congratulations!

Small efforts can create huge change for the entire broken world.
Let's love and inspire one another in a smallest way to save and care for our Common Home.

Pope Francis reminds us:

What is being asked of us is nothing other than a certain responsibility for the legacy we will leave behind, once we pass from this world. (Laudate Deum 18.)
